
Butte County Mosquito and Vector Control District

POLICY MANUAL

POLICY TITLE: Other Vectors
POLICY NUMBER: 4030

4030.1 Other Vectors and Arthropods may carry disease and may be a public nuisance. Other vectors and arthropods of medical importance may also carry disease and/or may cause a nuisance, which are monitored by the District, the Butte County Public Health Department, California Department of Public Health, and the Centers for Disease Control. Tick-borne disease and illness, plague, and Hanta-virus are examples of other diseases/illnesses that other vectors can carry and transmit.

4030.2 The District may participate in or conduct control programs on other vectors of public health importance, in addition to mosquitoes, as specifically authorized by action of the Board of Trustees, and subject to such limitations as the Board may impose.
